DAYS SAFARIS ADVENTURES

Where Everyday is An Exploration

PROPOSAL FOR MANAGEMENT

One system. Every lead, shilling and employee *in view.*

A custom operating system for Days Safaris Adventures: sales CRM, staff accountability, automation and reporting, in your hands, on your phone, under your full control.

Prepared for
Management, Days Safaris Adventures

Date
5 October 2026

Status
Sales CRM already built & running

WHY THIS MATTERS

From scattered leads to one source of truth

Today leads, prices and staff activity live in chats, notebooks and memory. That makes accountability hard and revenue invisible. This system fixes it at the root.

What hurts today

- ✕ Leads from WhatsApp, calls, expos and the website are scattered and some are never followed up.
- ✕ Packages are priced by hand: slow and error-prone, as happened with the Kuosha package.
- ✕ No clear view of who is working, who is performing, or what each person contributes.
- ✕ Reminders and follow-up emails depend on someone remembering.
- ✕ Paying monthly for third-party tools, without owning the data.

What you get

- ✓ Every lead captured once, assigned instantly and tracked to booking.
- ✓ Packages generated in seconds from hotel prices and number of days.
- ✓ Clock-in, EOD reports and a monthly scorecard for every employee.
- ✓ Automatic SMS and email reminders and bulk campaigns to your leads.
- ✓ Full ownership: one central database, no dependence on outside platforms.

1
central database

8
modules planned

24/7
visibility from any phone

0
outside CRM fees

It installs on any phone

The system is a web app that installs like a normal app on Android and iPhone. Management can open it anywhere to see leads, bookings and the team's activity as it happens. Staff use it from the office or the field.

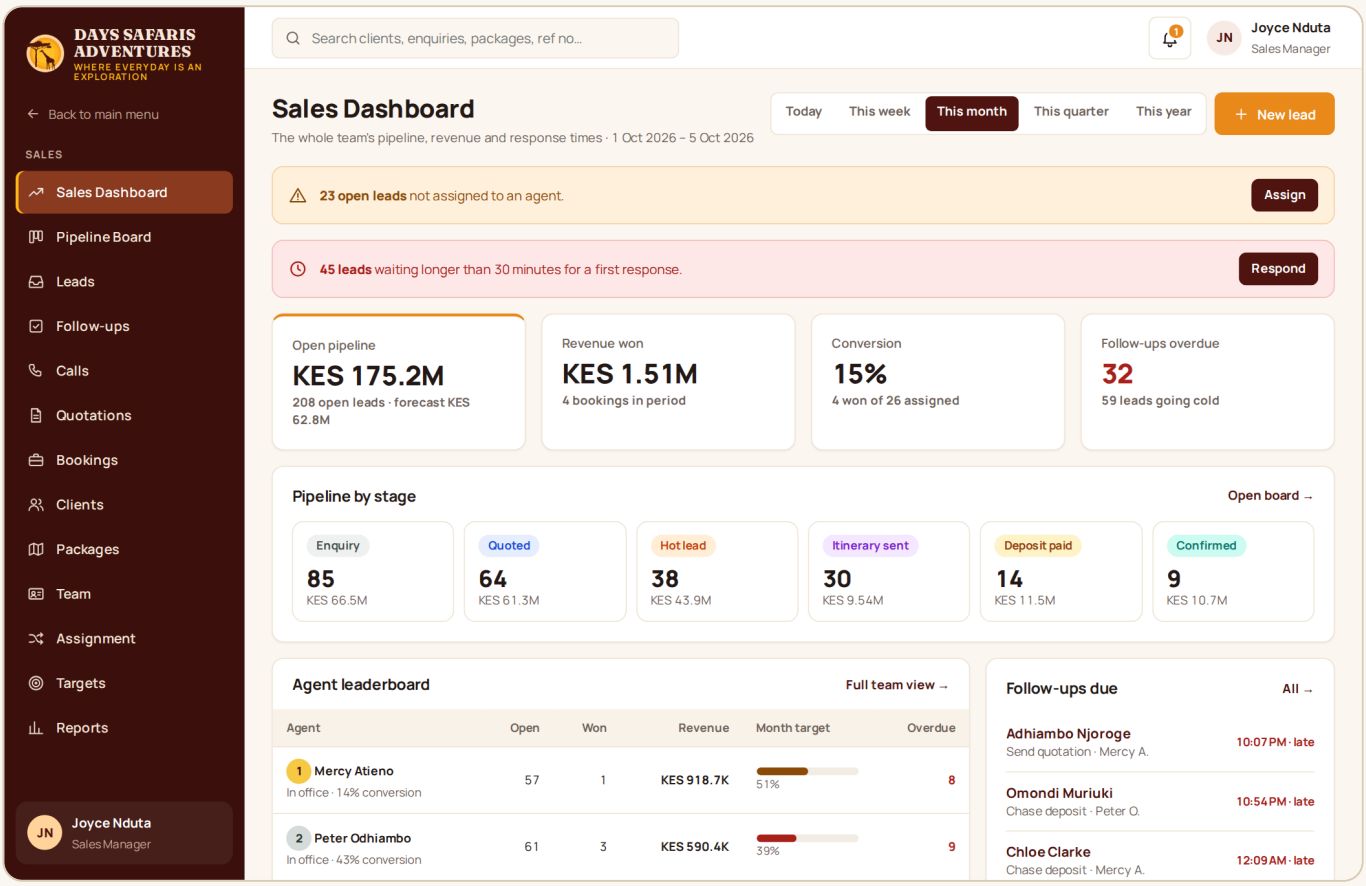

The journey of a lead, automated

1. **Captured** — Website, expo, WhatsApp, call
2. **Assigned** — Instantly, by rules
3. **Followed up** — Reminders by SMS & email
4. **Quoted** — Package built in seconds
5. **Booked** — Deposit tracked, revenue seen

ALREADY BUILT LIVE NOW

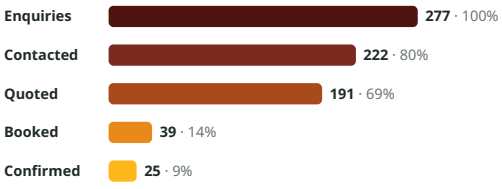

Sales CRM & pipeline: working today

The sales module is finished and running with demo data. Managers see everything; each agent sees only their own work.

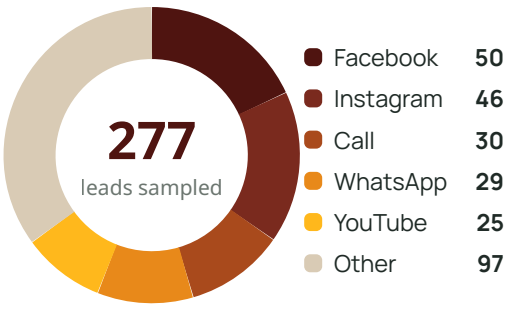

Sales Manager dashboard: pipeline value, revenue won, conversion, agent leaderboard and live team activity. (Demo data)

Lead-to-booking funnel

Sample of 277 demo enquiries

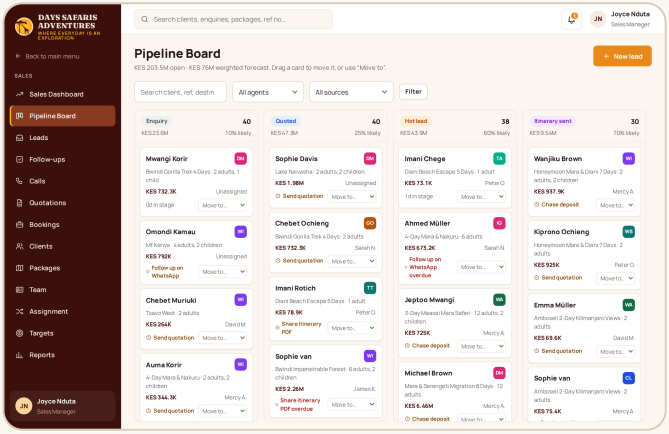

Where leads come from

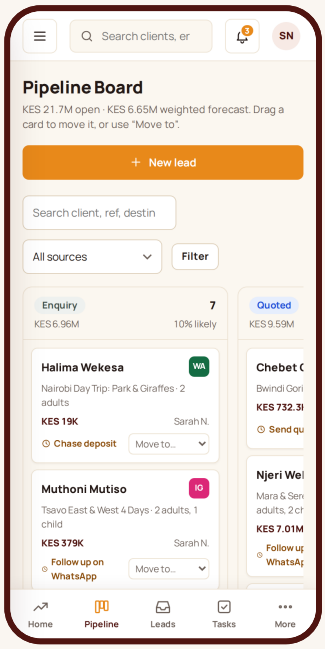

MANAGEMENT CONTROL LIVE NOW

See every agent. Move every deal.

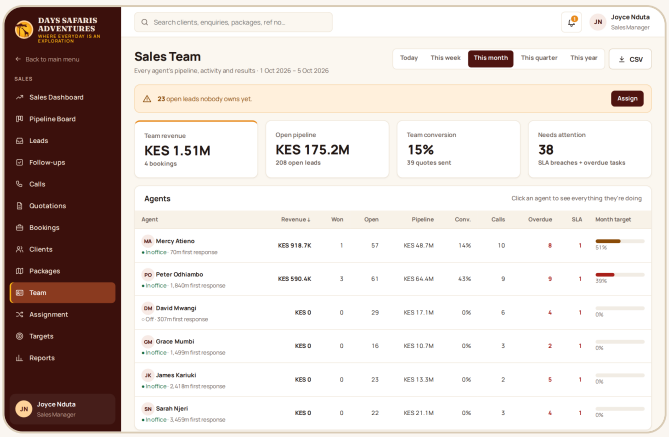

Drag deals across the pipeline, assign leads by rules or round-robin, send versioned quotations, record deposits, and track each agent against monthly targets.

Pipeline board: drag a lead from Enquiry to Quoted to Hot to Itinerary. (Demo data)

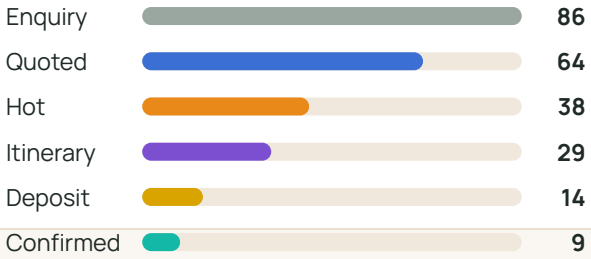

On a phone: the same system, built for the field.

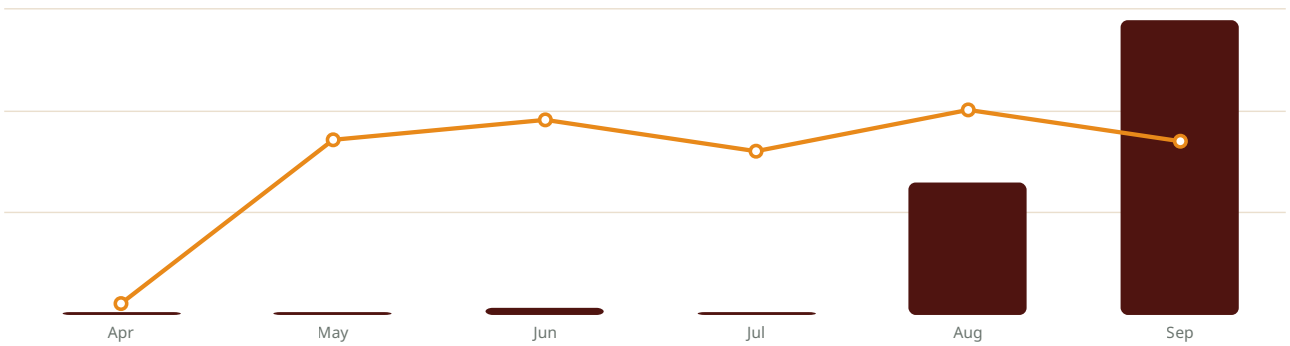

Team view: revenue, open leads, conversion, calls, overdue tasks and target progress per agent.

Pipeline by stage

Revenue vs target (KES millions)

Bars: revenue won. Line: monthly target. Demo data.

WHAT WE BUILD NEXT PROPOSED

Built around how your office actually works

Based on today's meeting, these modules extend the CRM into a full operating system connected to the Days Safaris website.

Clock-in / clock-out

Staff can only clock in from inside the office (office network and location check). Hours feed monthly performance.

Automatic emails & SMS

Bulk emails to collected leads, plus automatic SMS and email reminders for follow-ups, payments and travel dates.

Monthly employee performance

Calls, quotes, bookings, revenue and attendance per person, with a ranked scorecard at month end.

WhatsApp chatbot

Replies to new WhatsApp leads instantly, captures their details and assigns an agent straight away.

End-of-day (EOD) reports

Every employee files a short EOD report on their phone. You read them all in one place, wherever you are.

Website & expo lead capture

Connected to the Days Safaris website. Leads from the site and from expos flow straight into the pipeline.

Instant package builder

Enter hotel prices and number of days: a polished, priced package and itinerary is generated in seconds. No more manual pricing errors.

One central database

Every lead, booking, payment and employee action in one place that you fully own and control.

THE RESULT

Accountability you can see

Know how much the company is making, how much each employee is contributing, and which channels and packages work best, from one dashboard, any time.

NEXT STEPS

Ready to start immediately

The foundation is already built, so new modules can be added without starting from scratch.

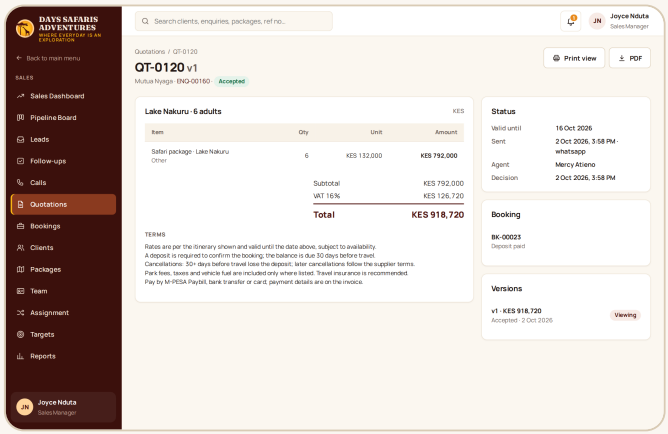

1. **Live walkthrough**
   See the working Sales CRM with your team and confirm priorities.

2. **Connect the website & WhatsApp**
   Leads from the site, expos and WhatsApp start flowing into the pipeline, with the chatbot assigning agents instantly.

3. **Staff accountability**
   Clock-in, EOD reports and monthly performance scorecards go live for the team.

4. **Automation & packages**
   Email/SMS reminders, bulk campaigns and the instant package builder.

5. **Training & handover**
   Staff install the app on their phones; you get full control of the data.

A quotation generated by the system: priced lines, VAT, versions, PDF and WhatsApp-ready.

INVESTMENT

Pricing is available upon request

We will tailor a quotation to the modules you want first. Let's talk this week.
